

Wanting to hook up safely with your iso buddy? 😊

Wanting to get an STI test but don't want to break social distancing recommendations?

Want to get a free STI test?

You've heaps of options:

♡ Have a HIV test delivered to your house
Visit atomodiagnostics.com/hiv-self-test

♡ Complete a short online quiz to see if you're at risk of chlamydia and gonorrhea. Download the completed Pathwest form, bring it to your local drop off centre and to a simple urine sample or a self collection vaginal swab.
Visit getthefacts.health.wa.gov.au/online-sti-testing

♡ Have a phone or video consultation with a health provider and collect and drop off a self collection of a urine sample, vaginal swab, throat swab and/or anal swab.

(GPs, medical clinics and sexual health clinics have various responses and set ups to COVID-19. Some may be offering phone and video appointments and some may only be offering appointments for urgent needs. Some may be offering extended free services during this time and some may be offering services with a private fee - its best to call and ask your preferred clinician for more information.)

For recommendations on youth friendly places to get an STI test, visit our referral resource theyeproject.org.au/resources/referral-resource-2020
