UPDATES

WHEN WAS THE LAST TIME YOU GOT AN UPDATE?

Cyber criminals are always finding vulnerabilities in your device's software. This can put your personal details at risk including things like your:

Bank Information

Passwords

Social Media Account Details

WHAT CAN YOU DO?

TURN ON AUTOMATIC UPDATES ON YOUR DEVICE!

Androids

1. Open your device's Settings app.
2. Tap System Software updates
3. Follow the on-screen instructions

iPhones

- Go to Settings > General, then tap software updates. It will show if an update is available

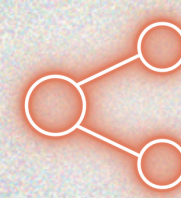

UPDATING YOUR DEVICES KEEPS YOU SAFE!!

Can fix issues and addresses new security concerns

They can improve performance and add new features

Can make your device more compatible with your apps

Updates no longer available on your device?

- Probably time to upgrade your device
- Alternatively, make sure no important information is stored on devices no longer able to update
